3 + = 5

The complex block features a dark green background with a pattern of faint educational icons like a calculator, clock, and E=MC². It contains three math problems with dashed boxes for missing numbers. The first problem is 10 minus a box equals 9. The second is a box minus a box equals a box. The third is 3 plus a box equals 5.

5 - = 3

+ = 16

4 + = 7

The background of this section is a dark teal color with a pattern of faint, light-colored icons related to education and science, including a calculator, a graduation cap, a beaker, a calendar, a ruler, and the equation E=MC².

A dark green board with a pattern of math-related icons (calculator, clock, pencil, ruler, etc.). It contains three math problems with missing numbers in dashed boxes:

- Top row: $4 + \square = 10$
- Middle row: $\square + \square = \square$
- Bottom row: $5 - \square = 3$

The background of the right panel is dark green with a pattern of faint white icons related to education and science, including books, a calculator, a calendar, a flask, a ruler, and the equation $E=MC^2$.

6 + = 9

+ =

10 - = 4

The background of this section is dark grey with a pattern of faint educational icons including a calculator, a clock, a book, a pencil, a ruler, a globe, a lightbulb, a graduation cap, a microscope, a beaker, a calendar, and the equation E=MC².

1 + = 6

+ =

8 + = 10

The background of this section is dark grey with a pattern of faint educational icons including a calculator, a clock, a book, a pencil, a ruler, a globe, a lightbulb, and the equation $E=MC^2$.

2 + = 6

- =

1 + = 8

The board features a dark green background with faint white icons of school supplies like books, calculators, and clocks. The math problems are written in white. The first problem is $2 + \square = 6$. The second is $\square - \square = \square$. The third is $1 + \square = 8$. Each problem has a dashed white box for an answer.
